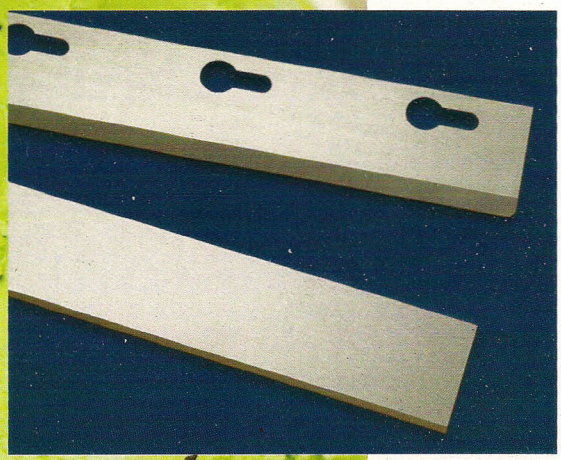
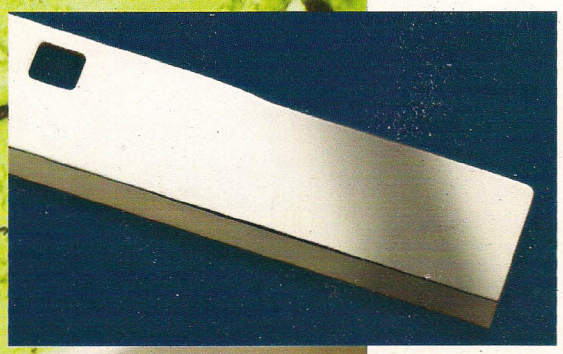
ICE CREAM SCRAPER KNIVES

High Quality Freezer Blades for the Ice Cream Production Industry

- Manufactured to strict OEM specifications and tolerances
- ISO 9001 certified factory
- Popular styles shipped from stock
- Custom blades available





Our freezer scraper blades are produced using the finest quality stainless steel alloys, precision grinders, nitrogen laser cutting, state-of-the-art CNC machinery, and exact computer controlled heat treating.

Our Crepaco replacement knives are manufactured using a special process of high polishing and lapping to produce a completely smooth mirror finish. This super polished finish prevents bacteria and rust from forming in the grinding surface grooves — unlike the conventionally ground blades of our competitors.

MACHINE TYPES INCLUDE:

APV INVENSIS
WAUKESHA CHERRY BURRELL
WCB ICE CREAM
HOYER
GRAM
EMERY THOMPSON
