For the last 15 years, American QuickSilver has been one of the world's leading producers of high quality pelletizer blades.

As the exclusive supplier to Gala Industries, we supply over 700,000 pieces annually in many styles and high alloys.

All of our blades are precision ground to ultra tight tolerances to minimize downtime. They are also heat treated in our vacuum furnaces. We offer alloys such as stainless steel, high chrome- high carbon steel, and ultra alloys such as ASP and CPM grades as well.

Although we cannot supply you with Gala blades for your machines, we can supply blades for all other makes and models of pelletizers.

Our years of experience in the pelletizer industry make us the perfect partner for all of your blade requirements.

Call or email us today for a full list of our pelletizer capabilities.
